All Digitizers can be equipped/upgraded with the design and pattern protected pressure measurement mat.

- The upgrade consists of
- the pressure measurement mat with associated electronic
 - the cover and
 - a software license

In the measurement mask, the user can select between:

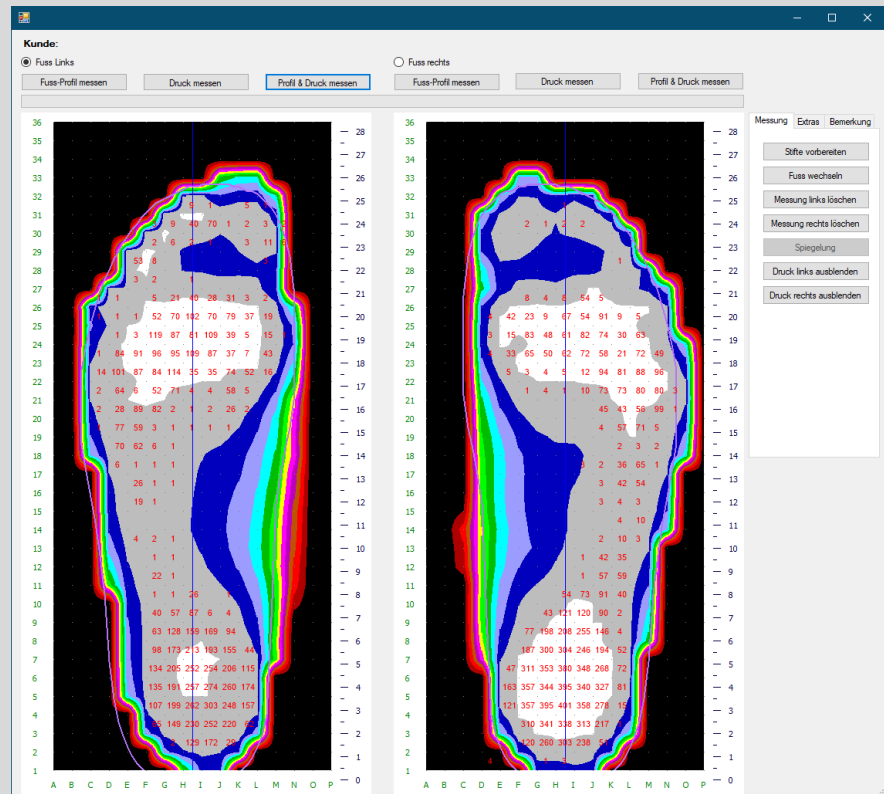

- a profile measurement
- a pressure measurement
- or simultaneously profile & pressure measurement

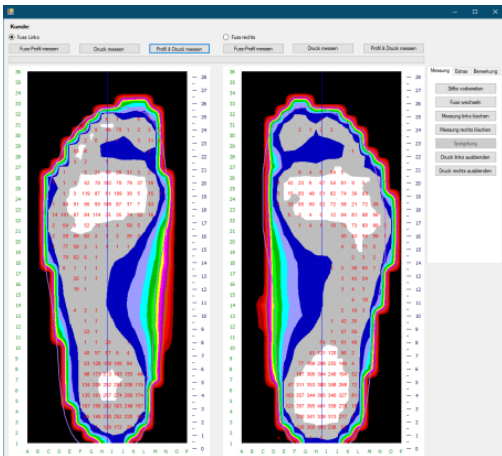

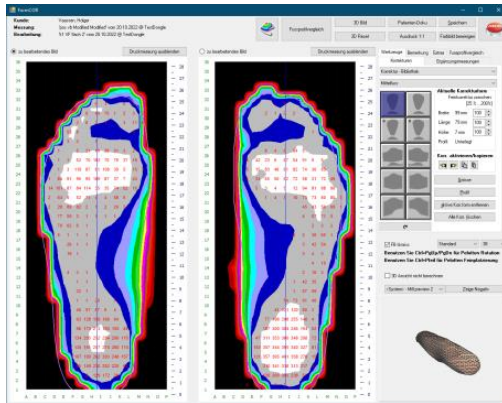

In the view mask, the pressure measurement can be shown or hidden as an overlay.

Orthofit

The user can also show and hide the pressure values in the editing mask:

- profile measurement with the absolute pressure values are shown in Kpascal as an overlay.
- Note that pressure measurement systems only provide values with ground contact.
- **The Orthofit profile image, however, measures and shows also the areas without ground contact.**
